How Does Climate Change Affect China?

Marc Gronwald

Senior Associate Professor of Economics International Business School Suzhou (IBSS) Xi'an Jiaotong-Liverpool University (XJTLU)

WhiteSpace | Jianing Building 5F | 500 Yanan Xi Lu 150rmb admission with drink | FREE for members Scan to RSVP or email editor@shanghai-review.org

The talk consists of three parts. The speaker will first look at the empirical data, and then discuss what we already know about climate change in China, before finally discussing urbanization trends and explaining why this is a particular concern for China.

Marc Gronwald is Senior Associate Professor in Economics at Xi'an Jiaotong-Liverpool University (XJTLU) in Suzhou. He obtained his PhD in Economics from the University of Hamburg. Prior to his appointment at IBSS, Marc held appointments as Senior Lecturer in Economics at the University of Aberdeen, and as Economist at the ifo Institute for Economic Research, Munich. Marc's research focuses on identifying, describing, and explaining patterns in univariate and multivariate time series data. He is particularly interested in large price movements, and he attempts to understand whether or not these movements can be explained by market fundamentals. In addition, he is interested in comovement between time series. He works on a number of commodity and financial markets, in particular crude oil markets, emissions trading schemes such as the EU ETS, and markets for cryptocurrencies such as Bitcoin. Recently, Marc also began working in the area of climate econometrics. In addition to these specific research areas, Marc has a general interest in economics of climate change, energy transition, and evaluation of environmental economic policies. Marc actively publishes in journals such as Energy Economics, Journal of International Money and Finance, and Environmental and Resource Economics.

China Crossroads hosts talks on all topics related to China, including business, foreign policy, and other areas as they relate to China, the idea being that China is both already a "crossroads" of the world and itself at a "crossroads" in terms of its future global influence.
